Adiba Ejaz

70 Morningside Drive, New York, NY 10027 • (646) 623-9275 • adiba.ejaz@columbia.edu • linkedin.com/in/adibaejaz • github.com/adibaejaz • adibaejaz.github.io

EDUCATION

Columbia University, New York, NY   May 2023
B.A. in Computer Science and Mathematics (GPA: 3.926. Dean's List.)
<u>CS coursework:</u> Advanced Programming* (*Unix, C*). Fundamentals of Computer Systems*. Data Structures (*Java*)
<u>Math coursework</u> Modern Algebra I*. Discrete Math*. Honors Math A and B (multivariable calculus & linear algebra).

GEMS Modern Academy, Dubai, UAE   May 2019
IBDP (GPA: 45/45, SAT 1570 800 Math 770 Verbal, 800 Math II). *Valedictorian. KS Varkey Scholarship.*

* this semester

SKILLS

- **Programming languages:** Java (proficient), Python (proficient), JavaScript, HTML, CSS.
- **Technologies & frameworks:** Git, LaTeX, MongoDB, Express.js, React.js, Node.js, Mathematica
- **Natural languages:** Trilingual in English, Urdu, Hindi. Semi-fluent in French.

PROFESSIONAL EXPERIENCE

Undergraduate Research Assistant, Columbia University. New York, NY   May 2020-Present
Software development for the Billinge Group, *Department of Applied Physics and Applied Mathematics.*
- Authored and maintained multiple *Python* scripts using test-driven development in *pytest* for Regolith, a *NoSQL* research group database management software, and reviewed other members' projects
- In team of 3, programmed full-stack web application using MongoDB, Express.js, React.js, and Node.js to replace Regolith command-line interface for improved usability
- Built *matplotlib* tool to analyze, correct, and project grant expenditure, reducing runtime of previous component functions by over 40%

Technical Intern. Dubai Future Accelerators. Dubai, UAE   March 2018
- Researched and proposed regional applications of start-up PowerIn.Space's wireless energy transfer technology in delivery drones and defibrillators for disaster relief
- Comparatively evaluated performance of start-up STAQU's machine-learning algorithm for speaker recognition

LEADERSHIP AND ACTIVITIES

Technology Director, *Columbia Superposition*
Conducting technical workshops with national non-profit developing CS pedagogy for women in computer science.

Team Liaison, *Columbia Debate Society.*
Cornell finalist. Top 5 individually at CUNY and American University. World Schools UAE National Team.

Directed reading program, *Association for Women in Math.*
Under Dr. Xuan Wu, University of Chicago. Gave talks on simple random walks. Built Gambler's ruin simulation in Python.

Directed reading program, *Undergraduate Math Society*
Markov chains and random walks on graphs.

RESEARCH

Spectral graph theory applied to topological data analysis. *Columbia University.*   May 2020-Present
Research under Professor Simon Billinge and Adjunct Scientist Michael Waddell in the Applied Physics and Mathematics department on developing an algorithm to extract homologies and filter noise of high-dimensional datasets using the Laplacian matrices of their persistence graphs.

On the partitioning of n-spheres. *International Baccalaureate.*   May 2018-19
Computational geometry paper arriving at a result enumerating the optimal partitioning of n-dimensional spheres by hyperplanes. Grade A (awarded to top ~10% of candidates).
